TECHNICAL SKILLS

Languages
C#, Java, TypeScript, JavaScript, Python, SQL, Prolog

Frameworks
.NET / ASP.NET Core, Vue.js, Node.js, React, Angular

Databases
SQL Server, PostgreSQL, MongoDB, Oracle SQL

AI & Data
ROS 2, YOLOv8, LLMs (Qwen3, Gemma), XGBoost, Pandas, NumPy, Genetic Algorithms

Tools
Git, GitHub, Docker, Linux, Bitbucket, Jira, Postman, Power BI, SSRS

Methodologies
Scrum, Agile

LANGUAGES

Portuguese	Native
English	B2

SOFT SKILLS

Teamwork
Problem solving
Communication with clients
Adaptability

OTHER

ISEP Motorsport Academy: race engineering and data analysis (Nov 2024)

Federated rowing (2011–2020), Scouts (2010–2016), 7-a-side football (2023–2024)

Volunteer at a coffee shop: trained new team members (2020–2022)

Nuno Almeida

Full Stack Developer · MSc student in Artificial Intelligence Engineering

I work as a full stack developer at Sistrade, on the company's ERP, mostly with .NET, Vue.js and SQL Server. My day to day is fixing bugs, building new features and talking with clients to understand what they need. I am also doing a Master's in AI Engineering at ISEP, and I like to build my own projects, like TESSERA, a fleet tracking platform.

WORK EXPERIENCE

Junior Full Stack Developer — Sep 2024 – Present
Sistrade · Porto

- Fix bugs and develop new features in the ERP, from the database to the interface (.NET, Vue.js, SQL Server).
- Rebuilt the Employee Portal (Vue.js, .NET 6, SQL Server, SSRS), used by internal staff and by clients.
- Developed HR modules for time tracking, vacations, overtime and medical appointments.
- Created HR reports in SSRS, such as pay slips and vacation schedules.
- Talk with clients to understand their problems and agree on the solution.
- Supervised an intern during their internship.

Software Development Intern — Mar 2024 – Jun 2024
Sistrade · Porto

- Helped develop an employee onboarding application with .NET and Vue.js.
- Built dashboards with ApexCharts to follow indicators such as employee turnover.

PERSONAL PROJECT

TESSERA – real-time fleet tracking — 2026 – Present

- Web platform where companies follow their vehicles live on a map, plan trips and send tracking links to their customers.
- Built with .NET, Vue.js and TypeScript, using PostgreSQL and MongoDB.
- Deployed on my own server with Docker.

EDUCATION

Master's in Artificial Intelligence Engineering — 2025 – Present
Instituto Superior de Engenharia do Porto (ISEP)

Bachelor's in Informatics Engineering — 2020 – 2024
Instituto Superior de Engenharia do Porto (ISEP)

UNIVERSITY PROJECTS

Trading Tomorrow (XAI) – Decision support system for commodity futures that explains its suggestions. React frontend with Java 25, Drools 9 and SWI-Prolog engines.

Auto Insurance Fraud Platform – Web platform that uses fine-tuned LLMs (Qwen3, Gemma) to analyse witness statements and YOLOv8 to assess vehicle damage.

SIMAGIA & ArgusAI – Car inspection with a TIAGo Lite robot (ROS 2, Nav2) controlled by a multi-agent system (SPADE), with fraud detection using LLMs.

Next Bet – Model with XGBoost and genetic algorithms to find sports bets with positive expected value.

RobDroneGo – Fleet management prototype for robots and drones (Angular, Node.js, .NET), with CI/CD and daily database backups on Linux.

COVID-19 Vaccination System – Java 17 application with DDD and MVC, role-based access and reports on waiting times.
